

Securing Your Weakest Link

Your network is only as secure as your weakest link. For many organizations, the weakest link is the end user. So how do you start strengthening your weakest link?

Educate, educate, educate!

Attend this free seminar event to learn about the key elements of a strong end user training program. The following topics will be covered:

- Importance of vigilance in security.
- Effective ways to communicate security message.
- How end user training is an effective way to improve ROI in today's tight market.
- Why is end user training important?
- Methods to test effectiveness of end user training programs / validation and measurement tools.
- Proper response to potential end user security violation.
- Phishing / data leakage / endpoint protection (What is it? How do you detect and stop it?)
- How do you spot security issues in a sea of false positives?

Register by responding to this invitation or at sdgsecure.com
